

Felting of knitted items in the washing machine

Handy felt bag „Lea“
 Felting wool „Lea“
 item-no. 40 217 390,
 3 balls 50 g each.
 Knitted with knitting needles
 size 12 mm
 item-no. 40 205 390.

- 40°C short washing programme
- Add approx. 10 drops of Mega Felting Fluid to the washing powder
- Put your workpiece together with 3-4 towels into the washing machine.

Make it like this:

1. Knit a small sample of about 10 x 10 cm and felt it like mentioned in the text.
2. Measure the sample after washing and calculate the shrinking of the sample.
3. Pre-estimate the size of the bag and start knitting.
4. Sew the felted flower on the handle of the bag.
5. Afterwards start the felting procedure with the washing machine.

Title: Felted flower string

Material:

Mega Felting Fluid, item-no. 53 640 00

Mixturing bottle, item-no. 53 641 00

Felting wool, item-no. 53 600 ...

Bubble foil, item-no. 53 616 00

Mega Filzer

Wet felting 10 times faster

as the conventional technique – MEGA fast

1 For creating the flower use the roving tuft. Apply the roving tuft in a wide choice of approx. 4-5 layers. One layer vertical and the other crosswise. (ø approx. 12 cm)

2 You create the flower stalks by pulling a part of the roving tuft circular. Place the part on the reverse side of the blossom, approx. 20 cm each.

3 Hold the dry wool flower stalk with one hand and spread the felting mixture on the reverse side of the blossom.

4 Rub the surface approx. 20 seconds (felting). Turn round the blossom and repeat this procedure.

5 Moisten the stalk with felting fluid and rub between your palms.

6 Repeat felting of the whole blossom for another 20 seconds.

7 Roll the blossom between your palms for another 20 seconds. Flatten the workpiece and repeat this procedure three times.

8 Modellize the blossom with your thumb so that you will get the funnel shape. Let it dry. Felt wastage approx. 50 %.

For felting with the Mega Felting Fluid you need

a bottle to mix the fluid, item-no. 53 641 00. Fill the bottle with water and mix it with 10 drops of the Mega Felting Fluid. Start felting as mentioned in the instruction with bubble foil item-no. 53 616 00

Mix the Mega Felting Fluid in a mixing ratio of 1:100 with water. The whole bottle of the Felting Fluid will give 5 litres of felting mixture.

- Felting of wool 10 times faster.
- Already by smooth rubbing you can model your workpiece.
- The finished workpiece has not to be rinsed out.
- The fluid works with cold or warm water.
- gentle to colours – efficient
- 100 % natural, dermatological tested
- Cares the hands with panthenol.
